Saving businesses time and money on their essential spend

0800 048 2928

Case study - green services

Being environmentally responsible is an ever increasing necessity in business which is why, in addition to achieving cost savings we also highlight the green benefits of our services to our clients.

Background

Our client is a modern private label coffee roasting company providing products to clients across Europe. They were using a vast amount of LPG (Liquid Petroleum Gas) per annum and were experiencing poor load pressure which resulted in quality control issues.

Action

We identified that switching to natural gas would not only improve the quality, but would also reduce the annual gas expenditure and vastly improve their carbon footprint. However there was no natural gas supply on the industrial site so we researched the possibilities further and after discussing the situation with National Grid presented a solution to our client. It was possible to install natural gas at a cost but the results would be hugely beneficial. Our client agreed and asked us to proceed with the transfer.

Results

We commissioned a custom built rotary gas meter and despite the expense of the installation saved our client **£79,519 per annum** which equates to a **49% saving**. In addition, due to the change from LPG to natural gas our client's carbon emissions reduced by **79,770.60Kg/CO2e per annum**. This is the equivalent to filling a hot air balloon 16.253 times or driving round the earth in an average car 9.811412 times!

Our client said:

"From the very start, BCR Associates took full control of the whole project liaising and coordinating all the relevant contractors and utility companies involved. The sheer workload in delivering this project on time and on budget was kept completely under control and the level of professionalism delivered by BCR Associates has been so high we have now awarded them our next project - to deliver a completely new supply of electrical power to the site. A testament to the work already delivered. Thanks BCR Associates, you made it look so easy!"

Our cost reduction green services

- ★ **Energy** - green electricity providers, advice and guidance on carbon emissions and Enhanced Capital Allowance (ECA)
- ★ **Telecoms** - carbon neutral providers, low green call rates and line rentals, and "green minutes" with net-zero carbon footprints
- ★ **Water** - water saving and recycling technologies, advice on saving money through water efficiencies
- ★ **Printing** - solid ink and white glove technology reducing printing costs and wastage
- ★ **Banking** - a panel of banks with sustainable credentials
- ★ **Insurance** - green insurance providers
- ★ **Vehicles** - leasing hybrid, electric and low emission vehicles.
